Software Engineer with strong experience building scalable web applications using React, Next.js, Vue.js and modern frontend architecture, complemented by backend development using Golang, Node JS and Python. Experienced in developing complex platforms including healthcare claim management systems, online consultation platforms, SaaS accounting systems, and enterprise dashboards. Passionate about building maintainable, high-performance systems and delivering excellent user experiences.

Work Experiences

Rey - Jakarta (Hybrid)

Feb 2025 - Present

Software Engineer Frontend

- Architected and developed multiple healthcare platform applications using Next.js, Vue.js and React, leveraging a micro-frontend architecture to support scalable product development across several domains.
- Built Claim Care Management, an internal tool used by operations teams to manage and process healthcare claims efficiently.
- Led the revamp of Rey's public website, improving code maintainability, UI consistency, and frontend performance.
- Developed a doctor consultation chat platform (doctor-side) enabling healthcare professionals to manage patient consultations through real-time messaging.
- Built Rey for Business dashboard used by corporate clients to monitor employee healthcare claims and benefits, improving claim visibility and operational efficiency.
- Implemented Manage Care WebView features, including doctor chat for users and prescription redemption flows integrated with the mobile application.
- Integrated an AI-powered chatbot interface to assist users in navigating healthcare services and support workflows.
- Implemented scalable state management using TanStack Query and Zustand, built reusable UI components with Material UI and Tailwind CSS, and improved code reliability through unit testing using Jest.
- Improved code quality and reliability by implementing unit testing with Jest and participating in cross-team code reviews.

PajakInd - Jakarta (Hybrid)

Mar 2023 - Feb 2025

Fullstack Engineer

- Developed and maintained full-stack web and mobile applications for an online tax consultation platform used by taxpayers and tax consultants.
- Built frontend interfaces using React and modern JavaScript frameworks, focusing on responsive UI and good user experience.
- Designed and implemented backend services and REST APIs using Node.js / Express and Python / FastAPI to support application features and business logic.
- Developed features for a SaaS accounting platform, enabling users to manage financial records and tax reports digitally.
- Implemented an online tax learning platform with video conference integration, allowing users to join virtual tax classes and consultations.
- Managed and integrated databases such as MySQL and MongoDB for storing financial and user data.
- Improved application performance, fixed critical bugs, and ensured system stability across web and mobile platforms.
- Implemented unit testing and end-to-end testing using Cypress, as well as UI automation testing using Maestro.

Telkom Indonesia - Jakarta (Remote)

Aug 2022 - Jul 2023

Frontend Developer

- Successfully do a tech migration from ReactJS to NextJS, resulting in a significant improvement in website performance and loading speed.
- Resolved complex bugs and errors, minimizing website downtime and ensuring a seamless user experience.
- Developed and implemented new UI design by precisely slicing and integrating design elements into the website, resulting in a visually appealing and engaging user interface.

Dicoding Indonesia - Bandung (Remote)

Feb 2022 - Jul 2022

Fullstack Developer

- Best Capstone Project Team in SIB Batch 2: Lifestyle, Shopping, and Entertainment Dicoding Challenge.
- Best Graduates of the Front-End Web and Back-End Development Learning Path.

Deins Agency - Remote

Jun 2021 - Mar 2023

Software Engineer Fullstack

- Led the development of full-stack web applications using React, Next.js, Vue.js, Node.js, and/or Laravel for various client projects.
- Designed and delivered business websites, dashboards, and e-commerce platforms tailored to client operational needs.
- Developed custom WordPress websites, themes, and plugins to support flexible content management and SEO optimization.
- Built backend APIs using Node.js / Express, Golang or Laravel with MySQL, PostgreSQL and MongoDB.

- Deployed and maintained production applications on AWS, Google Cloud, Supabase and hosting providers.
- Collaborated directly with clients to translate business requirements into scalable technical solutions.

Education Level

Bina Insani University - Bekasi, Indonesia

Jul 2019 - Mar 2023

Bachelor Computer Science/Informatics, 3.81/4.00

Organisational Experience

Computer Club - Bekasi, Indonesia

Sep 2021 - Sep 2022

Head of Programming Material

- Responsible for every programming learning material in the organization
- Lead 3 team members
- Organize Computer Club Activity

Skills, Achievements & Other Experience

- **Hard Skills** 🧠: JavaScript, TypeScript, Python, PHP, .Net, React, Next.js, React Native, Vue.js, Nuxt.js, Laravel, Node.js, Express.js, FastAPI, TanStack Query, Zustand, Tailwind CSS, Material UI, Jest, Cypress, Maestro, MySQL, MongoDB, Firebase, WordPress, WooCommerce, Git, Docker, AWS, Google Cloud, REST APIs
- **Projects** 🧠: Barterify - Website Platform for Barter and Trade In Goods and Services (Dicoding Challenge Winner)
- **Soft Skills**: Analytical Thinking, Critical Thinking, Logical Thinking, Leadership, Teamwork, Problem Solving, and Quick Learner
- **Certification**: Menjadi Front-End Web Developer Expert - Dicoding Indonesia(2022), Belajar Membuat Aplikasi Back-End untuk Pemula - Dicoding Indonesia(2022), Belajar Membuat Aplikasi Web dengan React - Dicoding Indonesia(2022)
